Overall Length:

1.870 inches

End Application:

Lgm30g, minuteman iii missile

Hole Inside Diameter:

0.625 inches

Thready Qty Per Inch (tpi):

12

Thread Size:

1.500 inches

Special Features:

Thread direction right hand; wrenching facility shape - hexagonal; screw thread length 1.370 inches; width across the flats 0.097 min to 1.00 max; counterbore and countersunk features not included; includes 2 nylok insert (p/n 9512605-05) 0.310 in long and 0.250 in dia. Which are press fit into bushing (p/n 9512605-01) ; holes for inserts are located at 90 degrees angle from each other, 0.250 in diameter and 0.310 in deep and on threaded part of bushing 0.250 in from end closest to wrenching hex end; to wrenching hex end; original name - bushing

Material:

Plastic

Material Specification:

L-p-410 federal specification single material response

Thread Series Designator:

Unf

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
