Overall Length:

10.500 inches

Overall Width:

5.250 inches

Overall Thickness:

0.046 inches

Construction:

Laminated

Special Features:

Has groove on one side of shim; groove is in the shape of an arch with radius of 5.109 in.; groove begins after first 0.141 in. Of length; other side of length has beveled corners with outside corner bevel length along length of 2.350 in. And outside corner length along width of 2.250 in.

Material:

Copper alloy 260

Material Specification:

Qq-b-613 federal specification all material responses

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07000
