Overall Length:

1.000 inches

Overall Width:

0.800 inches

Overall Thickness:

0.032 inches

End Application:

B-52 ecmi mod

Product Name:

Plate, structural, aluminum

Material:

Aluminum alloy 2024 or aluminum alloy 7075

Material Specification:

Qq-a-250/4 federal specification single material response or qq-a-250/5 federal specification single material response or qq-a-250/12 federal specification single material response or qq-a-250/13 federal specification single material response

Surface Treatment:

Anodize

Surface Treatment Specification:

Mil-a-8625, type 1 federal specification single treatment response or mil-c-5541, class 1a federal specification single treatment response

Style Designator:

Rectangular

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07000

Mil-std (military Standard):

Mil-a-8625 spec.
