Inside Diameter:

5.380 inches

Outside Diameter:

Between 6.240 inches and 6.250 inches

Overall Thickness:

Between 0.132 inches and 0.134 inches

Product Name:

Shim, setting, thrust bearing

Special Features:

Hazardous material review performed iaw str-700, rev 1

Material:

Steel comp 302 or steel comp 303 or steel comp 304 or steel comp 305 or steel comp 384

Material Specification:

Aisi 300 series assn standard single material response

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07000
