Overall Length:

96.000 inches

Overall Width:

48.000 inches

End Application:

Shield room; aircraft alerting communications emp upgrade (aace)

Surface Material:

Metal

Design Type:

Interior

Surface Type:

Sheet

Err Default:

Err default

Criticality Code Justification:

Alqy

Special Features:

Half panels used for walls; full panels used for floor, ceiling, and walls

Functional Description:

Provides electromagnetic pulse protection for all the electrical wires entering or leaving the shield room

Material:

Plywood

Material:

Plywood

Entry Date:

89-12-11

Reference Data And Literature:

T.O.31r2-2grc221-1

Supplementary Features:

Metal shielding mounted on both sides of 3/4" marine grade plywood

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T324-d
