Overall Height:

15.000 feet

Accessory Components And Quantity:

Stabilizing jacks, 4; tires, 4; illumination data- 150-watt medium baselight bulbs, 12

Specific Usage Design:

Engine maintenance

Window Quantity:

1

Door Quantity:

2

Retracted Length:

20.000 feet

Retracted Width:

18.000 preset inches

Application/function:

Shelter, engine maintenance

Special Features:

Safety load factor is 60 lbs per sq ft; guard rails and non-skid surfaces; ten years life expectancy

Functional Description:

Used to provide shelter for maintenance personnel during repair and maintenance of inboard and outboard engines of b-50, b-29, or c-97 aircraft

Entry Date:

90-02-07

Reference Data And Literature:

T.O.35e4-4-1

Relationship To Similar Equipment:

Supplements type j-1a

Supplementary Features:

Capacity: 230 sq ft; assembly: bybolting; assembly time: 240 man-hours; fabrication data: portable design, material is steel and canvas, structural framework with curtains, size of doorsare 2'8" x 6'8", only one level

Type/model Designation:

B-3

Fsc Application Data:

The shelter supplied consists of a structural framework covered with corrugated steel roofing and siding, sometimes canvas is used on ends

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T324-n
