Overall Length:

118.125 feet

Overall Height:

6.708 feet

Overall Width:

6.750 feet

Joint Electronics Type Designation System Item Name:

Shelter, electrical equipment, nonexpandable

Joint Electronics Type Designation System Item Type Number:

S-176g/msc-29

Accessory Components And Quantity:

Towing skids 3; lifting eyes 4; towing eyes 4

Usage Design:

Housing

Floor Material:

Aluminum

Door Quantity:

1

Wall Material:

Aluminum

Roof Material:

Aluminum

Shutter Quantity:

5

Screen Quantity:

2

Louver Quantity:

1

Ventilator Quantity:

2

Weather Insulation Extent:

Full

Electrically Shielded Feature:

Included

Special Features:

Air transportable; airtight and waterproof; complement listing sm-d-364262; shock resistant slings for lifting and hold down

Supplementary Features:

Two-way interchangeable with s-176p/msc-29 except for exhaust blower and other maintenance parts; utilizes shelter s-141/g mfg by radio engineeringproducts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T324-f
