Assembly Method:

Bolted

End Application:

Corrosion container cart

Accessory Components And Quantity:

Drive screw 6; o-ring 1; hex nut (1/2-20) 12; flat washer (1/2") 12; machine bolt (1/2-20) 12; mounting dial screw 2; mounting screw 4; dial 1; liquid level gauge 1; 2 npt pipe plug 1; legend plate 1; identification plate 1; plug filler assembly 1; access port cover 1; water reservoir 1

Liquid For Which Designed:

Water

Gasket Material:

Rubber, synthetic

Criticality Code Justification:

Agav

Product Name:

Inavy) assembly reservoir, water

Special Features:

Cylindrical shaped water tank assembly having a butadein rubber gasket, that will be able to undergo hydrostatic testing to meet asme code for design pressure of 150psig with no leakage

Shape:

Cylindrical

Supplementary Features:

Drive screw 6; o-ring 1; hex nut (1/2-20) 12; flat washer (1/2") 12; machine bolt (1/2-20) 12; mounting dial screw 2; mounting screw 4; dial 1; liquid level gauge 1; 2 npt pipe plug 1; legend plate 1; identification plate 1; plug filler assembly 1; access port cover 1; water reservoir 1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T324-h
