Shell Material:

Steel

Assembly Method:

Welded

End Application:

Bear water treatment system

Installation Design:

Horizontal

Fitting:

Included

Tank Capacity:

13.9 gallon, us measure

Liquid For Which Designed:

Water

Two Compartment Feature:

Included

Application/function:

Part of chlorine injection pump system

Product Name:

Bladder tank

Special Features:

Polypropylene lined; butyl rubber diaphragm; factory precharged to 38psi; 1 in nptm connection; 15-3/8in diameter x 22-9/16 lg; 26lbs; powder coat over zinc phosphate surface treatment

Reference Data And Literature:

Manufacturer data

Shape:

Cylindrical

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T324-h
