| Material Density:                                      |
|--|
| 2.6 pounds per cubic foot                              |
| Insulation Thickness:                                  |
| 4.000 inches   |
| Special Features:                                      |
| 90 degree short radius elbow; iron pipe size 1 1/2 in. |
| Material:  |
| Plastic, polyimide                                     |
| Shelf Life:  |
| N/a  |
| Unit Of Measure:                                       |
|  |
| Demilitarization:                                      |
| No   |
| Fiia:  |
