| Material Density:                                  |
|--|
| 4.0 pounds per cubic foot                          |
| Insulation Thickness:                              |
| 5.000 inches                                       |
| Special Features:                                  |
| 90 degree short radius elbow; iron pipe size 6 in. |
| Material:  |
| Plastic, polyimide                                 |
| Shelf Life:  |
| N/a  |
| Unit Of Measure:                                   |
|  |
| Demilitarization:                                  |
| No   |
| Fiig:  |
