| Material Density:                          |
|--|
| 7.0 pounds per cubic foot                  |
| Insulation Thickness:                      |
| 2.500 inches                               |
| Special Features:                          |
| Straight section; iron pipe size is 3/8 in |
| Material:                                  |
| Plastic, polyimide                         |
| Shelf Life:                                |
| N/a  |
| Unit Of Measure:                           |
|  |
| Demilitarization:                          |
| No   |
|  |
