**Fabrication Method:**

Woven

**Inside Diameter:**

4.000 inches

**Length:**

30.000 inches

**End Application:**

Mrap m-atv uik

**Design Form:**

Full round

**Temperature Rating:**

750.0 degrees celsius

**Special Features:**

Thermojacket e is a knitted sleeve used for insulation of high temperature exhaust systems; designed with basalt yarns; can expand up to

1.5 times its own diameter

**Flexibility:**

Flexible

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A016a0
