Fabrication Method:

Molded

Insulation Thickness:

0.500 inches

Inside Diameter:

0.375 inches

Length:

72.000 inches

End Application:

Air condition (hvac/r)

Design Form:

Split round

Temperature Rating:

Between -70.0 degrees fahrenheit and 200.0 degrees fahrenheit

Special Features:

Environmentally friendly, cfc free, flexible elastomeric thermal, pre-slit w/ pressure sensitive adhesive on both seam; color - black; closed cell, non-porous, fiber-free epa antimicrobial agent to resist mold, fungal and bacterial growth, meets astm e84 surface burning rate - flames 25 or less, smoke 50 or less; 6 foot length

Flexibility:

Flexible

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A016a0
