**End Application:**

Core material, cellular, structural

**Special Features:**

High strength up to 420 degrees f. Dielectric properties, bonding surface, readily heat formed; material is glass fabric reinforced honeycomb in which heat resistant phenolic resin is used both for initial impregnation; thickness is 0.310 inches, need to ref st0130gb0004

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T232-f
