| Basic Material:                          |
|--|
| Aluminum alloy                           |
| Cell Condition:                          |
| Expanded                                 |
| Cell Size:                               |
| 1/8 in.                                  |
| Cell Perforation:                        |
| Not included                             |
| Density Rating:                          |
| 4.5 pounds per cubic foot                |
| Ribbon Direction Dimension:              |
| 48.000 in                                |
| Designed Ribbon Direction Dimension:     |
| 0.750 in.                                |
| Designed Transverse Direction Dimension: |
| 96.000 in.                               |
| Shelf Life:                              |
| N/a                                      |
| Unit Of Measure:                         |
|  |
| Demilitarization:                        |
| No                                       |
| Fiig:                                    |
| T232-f                                   |
| Mil-std (military Standard):             |
| Mile-7/38 spec                           |
