Functional Description:

A 312-522 kc frequency band modulates a 564 kc carrier frequency. The output is a 12-252 kc frequency band

General Description:

3 in. X 3.375 in. X 4.625 in. In o/a dimensions; 3 transformers, 7 transistors, 2 diodes, 8 capacitors, 23 resistors, 2 printed circuit boards; plugs into standard 9 pin tube socket

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
