Overall Length:

8.500 inches

Overall Height:

1.688 inches

Overall Width:

6.688 inches

Component Type And Quantity:

1 bracket and 9 transistor and 2 connector and 1 fuse and 1 fuseholder and 1 switch and 1 knob and 1 printed wiring board and 1 inductor

Special Features:

Yconnector and rack mtd; integrated circuit 4, fixed resistor 23, variable resistor 3, resistor network 3, fixed capacitor 21, semiconductor device-diode 24, pad transistor 9, connector mount 1, panel converter module 1, transformer coupling 1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A511I0
