Overall Length:

8.500 inches

Overall Height:

1.688 inches

Overall Width:

6.688 inches

Component Type And Quantity:

1 bracket and 7 transistor and 2 connector and 1 fuse and 1 fuseholder and 2 switch and 1 thermistor and 1 knob and 1 printed wiring board

Special Features:

Gconnector and rack mtd; integrated circuit 9, fixed resistor 42, variable resistor 2, semiconductor device-diode 18, fixed capacitor 21, jack test point 3, pad transistor 14, connector mount 1, panel module 1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A511I0
