End Application:

Rt-600 (v) synthesized communications system

Electrical Power Source Relationship:

Operating

Signal Type:

Ring down and supervisory

Special Features:

Foreign exchange, station; subassembly

Functional Description:

1converts facility-side e and m signaling to loop signaling conventionally used at station end of a foreign exchange (fx) or off-premise extension (opx) circuit; used at both ends of an e and m facility to provide automatic ringdown operation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
