**End Application:**

Rt-600 (v) synthesized communications system

**Electrical Power Source Relationship:**

Operating

**Signal Type:**

Ring down

**Switchboard Side Current Type:**

Ac

**Functional Description:**

Converts e-lead signals to ringing signals toward the local terminatio (local station or pbx) and converts ringing signals or keyed ground input from the local station or pbx to m-lead outputs; when mounted on 6461 common signaling module, interfaces 4 wire e and m transmission facility w/ termination employing either ac switchboard or dc manual ringdown signaling

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T320-a
