End Application:

Rt-600 (v) synthesized communications system

Electrical Power Source Relationship:

Operating

Signal Type:

Ring down

Switchboard Side Current Type:

Ac

Functional Description:

Converts e-lead signals to ringing signals toward the local terminatio (local station or pbx) and converts ringing signals or keyed ground input from the local station or pbx to m-lead outputs; when mounted on 6461 common signaling module, interfaces 4 wire e and m transmission facility w/ termination employing either ac switchboard or dc manual ringdown signaling

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
