End Application:
Rt-600 (v) synthesized communications system
Electrical Power Source Relationship:
Operating
Signal Type:
Ring down
Switchboard Side Current Type:
Ac
Functional Description:
Converts e-lead signals to ringing signals toward the local terminatio (local station or pbx) and converts ringing signals or keyed ground inpu
from the local station or pbx to m-lead outputs; when mounted on 6461 common signaling module, interfaces 4 wire e and m transmission
facility w/ termination employing either ac switchboard or dc manual ringdown signaling
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
T320-a
