End Application:

Rt-600 (v) synthesized communications system

Electrical Power Source Relationship:

Operating

Signal Type:

Supervisory

Special Features:

Foreign exchange, office; subassembly

Functional Description:

Converts facility-side e and m signaling to loop signaling conventionally used at the switching-equipment (office) end of a foreign exchange (fx) or off-premis extension (opx) circuit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
