Overall Length:

24.000 inches

Overall Height:

5.250 inches

Overall Width:

17.000 inches

Average Life Measurement:

Not rated

End Application:

Fscn/cue

Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Rack

Circuit Construction Type:

Solid state

Connection Type And Location:

Err-060 flanged

Connection Contact Type And Quantity:

4 combat control team members drain

Functional Description:

Analyzes speech signals and digitizes them into a bit stream of 4800 or 9600 binary digits per second; since this is too slow for transmission, specialized signal processing algorithms are used to compress the analog data by five to ten times its original collection rate before transmitting it; performs the conversion of analog speech to digital data and visa versa, independent of each other

Fsc Application Data:

P/n a16944-01 digital voice equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32200
