General Description:

Control selects and passes voice, analog and digital data!Power data: operating power source: 20-32 vdc from vehicular power supply on 20-36 vdc from 24 volt battery!Power consumption, 3 watts!Output data: output impedance 600 ohms porm 20 percent over a range of 300 to 3000 h2!Output resistance less than 750 ohms!Operating temp range, minus55 degrees f to plus 125 degrees f!Weight, 7 lbs max!Dim data: 6.2 in.D by 5 in.W by 3in. H o/a

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
