End Application:

Vipc1000-xa-mdm

Special Features:

Sectera viper universal secure phone pstn, and ip capable (us national). Standard pstn or voip desktop phone provides type 1 scip (secure communications interoperability protocol) end-to-end high assurance secure voice and data capability for ip networks using sccp (skinny call control protocol) or sip (session initiation protocol)/as-sip (assured services-sip). Universal software required for menu driven transition between the network protocols (new production models ship with universal software, older models are user upgradeable to the universal software). National security agency (nsa) government contract purchases include: voip phone chassis, handset, adjustable foot stand, rj-11 cable, two ethernet cables, power supply, north american power cable, user's manual, two year warranty and pstn connect adaptor. Vendor direct sale purchases, for operating in pstn mode, requires separate purchase of the pstn connect adaptor (p/n: vippstn01)nsn 5935-01-573-7478.
