End Application:

Ste-rt

Special Features:

The ste-rt (isdn, pstn, tri-tac.Mse) the ste-rt is a tactical ste-r that adds a four-wire tactical (mse) connection in addition to isdn and pstn connectivity. The ste-rt enables the tactical ste user to multi-party secure conferences and dial into secure enclave red switches to complete calls to legacy equipment. Future upgrades are available via download from the government website.
