End Application:

Receiving set, countermeasures, an/flr- (v) 8

Functional Description:

Interfaces the matrix multiplexer (system control group) with five group c matrix assemblies of monitor and test group of equipment. Utilizes differential line receivers, logic gates and inverter buffers to receive and distribute digital logic commands for completing rf paths in test matrices

General Description:

6.500 in. L; 19.000 in. W; 8.700 in. H; rack mounted

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
