General Description:

Provides control switching between two trunk encryption device and primiary multiplexer-demultiplexer combinations (online and offline spare); provides interface for one trunk encyption and primary multiplexer-demultiplexer combinations; provides online performance measurements and offline equipment testing capabilities; input voltage; 11 (108-132) vac; input current: 45a; dimensions: 86.250 in. W; 31.130 in. D; 81.060 in. H; consist of timing device 1; interface unit 5; converter interface unit 4; multiplexer-demultiplexer 3; control status 2; panel, patch trompeter 1; oscilloscope tektronix 1; data test set 2; rack 4
