End Application:

Gadgeteer ii system

Power Source:

External

Intelligence Input Method:

Electrical

Special Features:

C/o demodulator/recognizer, intel multi-bus, 18 slot card cage

Functional Description:

Performs demodulation and recognition of hf signals using digital circuitry and intel multibus connections; circuitcards perform as bus masters to access memory and input/output ports

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A30800
