Functional Description:

Demodulates up to 20ppm vidio signals, each of the group's 20 md-1154/g demodulators accepts one ppm input signal and outputs up to 16 audio channels

General Description:

Operating requirements 115 vac +/- 10 vrms, 48-62 hz, single phase, 3820 watts; 85.000 in high by 96.000 in wide by 40.000 in deep; output frequency range 0.2 to 3.4khz, remote control interpace ieee-488; floor mounted

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
