Functional Description:

Digital data switching unit switches an off line aggregate source into the data line if the on line fails

General Description:

Operating requirements 115 vac, 47/63hz, 1amp, connects aggregate data and clk lines to output of one of two grypto units, provides a patch panel for convenient diagnostics of signals, provides a built in error rate test circuit use in conjunction with xmit and rcv tests, dimensions 23.500 in length by 19.000 in wide by 7.000 in high

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
