Overall Length:

3.000 inches

Overall Height:

0.468 inches

Overall Width:

2.687 inches

Component Type And Quantity:

1 capacitor and 1 inductor and 1 resistor and 1 transistor

Special Features:

Major components: semiconductor device, diode 1; terminal board 1; mounting method and configuration: holes for screws, four 0.140 inch diameter mounting holes irregularly spaced

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
