Dc Voltage Rating:

12.0 volts

End Application:

An/grc-171, an/grc-171 (v) 1

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Not included

Criticality Code Justification:

Feat

Special Features:

Item name: power amplifier module a8, contains modulator (high level), rf driver, and power amplifier circuits, note: electrostatic discharge sensitive device

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T213-a
