**Dc Voltage Rating:**

12.0 volts

**End Application:**

An/grc-171, an/grc-171 (v) 1

**Electrical Power Source Relationship:**

Operating

**Internal Battery Accommodation:**

Not included

**Criticality Code Justification:**

Feat

**Special Features:**

Item name: power amplifier module a8, contains modulator (high level), rf driver, and power amplifier circuits, note: electrostatic discharge sensitive device

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T213-a
