NSN 5820-00-509-9852

Radio Frequency Tuner - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5820-00-509-9852

Overall Length:
21.500 inches
Overall Height:
7.750 inches
Overall Width:
5.000 inches
Basic Shape Style:
Rectangular or square
Identification Designator:
Tn178apr13-80058
Inclosure Type:
Encased
Operating Control Method:
Manual
Control Type:
Remote
Circuit Construction Type:
Circuit Construction Type: Electron tube
Electron tube
Electron tube Frequency Per Channel:
Electron tube Frequency Per Channel: 90.0 megahertz operating channel err-100
Electron tube Frequency Per Channel: 90.0 megahertz operating channel err-100 Connection Type And Location:
Frequency Per Channel: 90.0 megahertz operating channel err-100 Connection Type And Location: Receptacle, coaxial front
Frequency Per Channel: 90.0 megahertz operating channel err-100 Connection Type And Location: Receptacle, coaxial front Fsc Application Data:
Frequency Per Channel: 90.0 megahertz operating channel err-100 Connection Type And Location: Receptacle, coaxial front Fsc Application Data: Radar equipment, airborne
Frequency Per Channel: 90.0 megahertz operating channel err-100 Connection Type And Location: Receptacle, coaxial front Fsc Application Data: Radar equipment, airborne Shelf Life:
Electron tube Frequency Per Channel: 90.0 megahertz operating channel err-100 Connection Type And Location: Receptacle, coaxial front Fsc Application Data: Radar equipment, airborne Shelf Life: N/a
Electron tube Frequency Per Channel: 90.0 megahertz operating channel err-100 Connection Type And Location: Receptacle, coaxial front Fsc Application Data: Radar equipment, airborne Shelf Life: N/a
Electron tube Frequency Per Channel: 90.0 megahertz operating channel err-100 Connection Type And Location: Receptacle, coaxial front Fsc Application Data: Radar equipment, airborne Shelf Life: N/a Unit Of Measure:
Electron tube Frequency Per Channel: 90.0 megahertz operating channel err-100 Connection Type And Location: Receptacle, coaxial front Fsc Application Data: Radar equipment, airborne Shelf Life: N/a Unit Of Measure: Demilitarization:
Electron tube Frequency Per Channel: 90.0 megahertz operating channel err-100 Connection Type And Location: Receptacle, coaxial front Fsc Application Data: Radar equipment, airborne Shelf Life: N/a Unit Of Measure: Demilitarization: Yes - demil/mli
