Frequency Rating:

60.0 hertz

Maximum Power Dissipation Rating:

8.0 watts

Accessory Component Quantity:

1 and 1 and 1 and 1 and 1 and 1 and 1

Furnished Items:

Antenna; antenna mast; radio receiver; radio transmitter; rectifier; chest; chest

Accessory Controlling Agency:

Sig

Accessory Identifying Number:

An-94a type no. And ma-7a type no. And bc-624a type no. And bc-625a type no. And ra-62b type no. And ch-172b type no. And ch-173b type no.

Internal Battery Accommodation:

Not included

Receiver Frequency Rating:

Between 100.0 hertz and 156.0 hertz

Transmitter Frequency Rating:

Between 100.0 megahertz and 156.0 megahertz

Frequency Band Type And Quantity:

1 receiving and 1 transmitting

Frequency Channel Type And Quantity:

4 receiving and 4 transmitting

Emission Type:

A3 receiving and a3 transmitting

Phase:

Single

Special Features:

Ac voltage rating 1st operating power rqmt 115.0 volts or 230.0 volts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T198-b
