Ac Voltage Rating:

120.0 volts

Frequency Rating:

60.0 hertz

Maximum Power Dissipation Rating:

25.0 watts

End Application:

An/mpq-t3

Electrical Power Source Relationship:

Operating

Emission Type:

F5 receiving

Phase:

Single

Supplementary Features:

Designed for operation from composite video-sync signals or from systems in which external sync is provided; video input 0.75 to 1.5v p-p, negativesync, high impedance bridge or 75 ohm termination; video response amplifier bandwidth in excess of 10 mhz; horizontal resolution 640 lines or better; picture tube 12 in, 90 degrees deflection, 74 sq in; 10 kv high voltage; panel controls brightness, contrast, vertical and horizontal hold, power on/off

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T198-b
