Ac Voltage Rating:

Between 95.0 volts and 130.0 volts

Frequency Rating:

50.0 hertz and 60.0 hertz

Maximum Power Dissipation Rating:

90.0 watts

End Application:

An/msr-t1

Electrical Power Source Relationship:

Operating

Emission Type:

F5 receiving

Phase:

Single

Precious Material And Location:

Pin plated gold and circuit card assembly silver

Supplementary Features:

Video composite 1.0 p-p ; video amplifier freq response 60 hz to 10 mhz; distortion 2 pct; oper temp 0 to 55 degrees c; stor temp -60 to +70 degrees c; altitude 10000 ft; sync 1v to 8v p-p sync negative; sync input switch provides for selection of internal or external composite sync

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T198-b
