End Application:

5820-01-121-7079 multiplexer set

Power Source:

External

Intelligence Input Method:

Electrical

Special Features:

Module handles asynchronous data rates range 50bps to 19200bps

Functional Description:

Retimes the users data bits to remove distortion caused by noisy or poorly adjusted channels

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A30800
