General Description:

6permits up to 140 sites to be signaled on a selective basis; input impedance 10.0 kilohms bridging; output signal interval 4, 8, or 12 seconds; 45.0 milliamps at minus 24 vdc; operating ambient temperature range 0.0 degrees c to plus 55.0 degrees c

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
