Overall Length:

19.500 inches

Overall Height:

7.000 inches

Overall Width:

19.000 inches

End Application:

Mark ivb

Input Frequency Rating:

Between 10.000 kilohertz and 4.200 gigahertz

Receiver Emission Type:

F9

Guard Channel:

Not included

Auxiliary Bandsread Tuning Feature:

Not included

Plug-in Tuning Unit:

Not included

Supplementary Features:

Accepts a series of front panel plug-in rf tuners and fm, pm and bpsk demodulators; microprocessor controlled for local control or remote control using the rs-232c interface bus; non-volatile memories used for last command and storage of addressable memory; single keyboard entry for programmable functions; up to 10 receiver setups can be stored for instant recall; high visibility led readouts indicate rf frequency, if bandwidth, video bandwidth, video level, agc time constant and relative second lo tuning; led indicators are used for signal level, tuning and mode status; am output signal compatible with all antenna tracking systems; certified to mil-std-461b; storage temp. Range -55 to +65 degrees c; operating temp. Range 0 to +50 degrees c; unit is the model 1400-mr telemetry receiver

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T199-d
