Ac Voltage Rating:

Between 120.00 volts and 220.00 volts

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

End Application:

Alaska air combat maneuvering instrumentation system, training, an/gsq-t56

Electrical Power Source Relationship:

Operating

Emission Type:

F5 receiving

Special Features:

Ip signals: video comp 1vp-p nom, sync (comp on green ip) neg polarity; non-comp 0.7vp-p nom black negative; imped 75 ohms or higher; scanning freq vert 40-70 hz, horiz 62-67 khz; crt 19in, resolution 1280 pixels horz, 1024 pixels vert; frt panel ctrls for pwr, degauss push button switch, brightness knob adjustment

Functional Description:

Color graphics monitor, signals from scan converter drives monitor, part of display and debriefing system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T198-b
