End Application:

An/fsq-15 (v) air force satellite control network/common user element

Special Features:

Qoperating power requirements; 120vac, 60hz; technical characteristics; speed dc to 100kbps, phase 0 or 180deg; propagation delay 3 microseconds, differential delay 1 microsecond; operating temperature 0 to 70deg celsius

Functional Description:

Provides optical isolation between various equipment within the ol-421/fsq-15 (v) telemetry processing computer group

General Description:

dimensions; 15.75in high, 19.00in wide, 22.00in deep

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
