Ac Voltage Rating:

110.0 volts and 230.0 volts

Dc Voltage Rating:

24.0 volts and 48.0 volts

Frequency Rating:

Between 40.0 hertz and 440.0 hertz

End Application:

Ter-102wb/ac series wideband microwave terminals

Electrical Power Source Relationship:

Operating

Internal Battery Accommodation:

Included

Operating Frequency:

Between 7.125 gigahertz and 7.725 gigahertz

Phase:

Single

Special Features:

Rf interface, 50 ohm unbalance; analog baseband impedance, 75 ohm unbalanced; built-in-test

Functional Description:

Baseband selection: (1) digital, bell standards up to 45mb/s ds-3 cept standards up to 34mb/s ms; (2) telephony, up to 2400 channels fdm; (3) video, pal secam mesecam ntsc wideband radar

Supplementary Features:

Consists of 157-0458-003 (tcm-624at-wb/ac) transmitter and 157-0459-003 (tcm-624ar-wb/ac) receiver

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T199-c
