**Overall Length:**

20.810 inches

**Overall Height:**

1.656 inches

**Overall Width:**

16.880 inches

**End Application:**

427m norad cheyenne mountain complex improvement program

**Special Features:**

The ve-12 enclosure (p/n 110001-1) is a rack-mounted, stand-alone enclosure, that houses one or two multiple rate voice card (mrv); the enclosure provides the necessary ac or dc power conversion to operate the mrv; the ac voltage is connected via an iec socket/power entry module that contains integral on/off switch, fuse, and emi line filter; an internally mounted ring voltage generator provides the necessary 100 vrms, 20 hz, ringing signal to support the fxs interfaces

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
