Average Life Measurement:

Not rated

End Application:

Afscn oss

Basic Shape Style:

Irregular

Inclosure Type:

Encased

Installation Design:

Rack

Circuit Construction Type:

Solid state

Signal Data Type Per Channel:

Operating channel synchro

Special Features:

Manufacturer name 'time code translator' -provides precision time code and rate outputs synchronized to a serial time code input (normally irig b), standard outputs are one serial modulated time code (normally irig b) and parallel bcd time from microseconds through hundreds-of-days, 1pps & 1kpps

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
