End Application:

Spacelift range western transmission network

Emission Type:

A3j

Operating Frequency:

Between 2.000 megahertz and 30.000 megahertz

Special Features:

The vafb hf transmitter system consists of twelve collins 10kw and two 45kw transmitters power amplifiers and 14 antennas of different types to provide the required frequencies and power output, the vafb tx provides a link between ships, aircraft and range control elements in the missile flight path

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T199-c
