**End Application:**

Spacelift range western transmission network

**Emission Type:**

A3j

**Operating Frequency:**

Between 2.000 megahertz and 30.000 megahertz

**Special Features:**

The hf transmitter system located at ewa, hawaii is remotely controlled by the wheeler network control center (wncc), it consists of twen type 310v-1 exciters with ten 208u-10 and 205j-1a power amplifiers, transmitting over 17 assorted antennas in the 2 to 30mhz range, the ewa provides a link between ships, aircraft, downrange islands and the range control elements in the missile flight path

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T199-c
